## **NEW FITTINGS FOR THE NEW YEAR!**

Tradesman is introducing a complete new line-up of new fittings that will significantly help reduce the labour involved in commercial HVAC installation. Fittings include connecting collars, saddles, take offs, etc.

These fittings are manufactured from galvanized steel, meeting spec ASTM A-653 (Lockforming quality). They feature a double legged EPDM gasket which creates a virtually airtight connection when slipped into spiral pipe.

For more information and spec details, please visit Tradesman's website at [www.tradesmanmfg.ca](http://www.tradesmanmfg.ca).
